

at The Bellbird...

Here at the Bellbird, we discover, learn and are curious about our understanding of the world and improve these through 5 key areas of science:

1. Living things and their habitats (including rocks, classification, dependency, seed dispersal and reproduction in plants, the solar system, planets and our relationship with the universe).
2. Materials and their properties (including reversible and irreversible changes, floating, sinking, heating, cooling, states of matter, solutions and solutes).
3. Forces (including friction, magnetism, gravity, air-resistance, water-resistance).
4. Animals including humans (including the human life-cycle, evolution and inheritance, the digestive system, respiratory system and the skeleton).
5. Light and sound (including refractions, electricity, circuits, shadows, insulators, conductors, soundwaves, reverberation, and how sound and light travel).

If you are able to come and share your science expertise (or know someone who could) please contact me via the Office:

FAO Ms Guggiari

at the Bell-
bird...

Alongside scientific knowledge and understanding, we want to ensure our children have the necessary skills to be able to work scientifically when faced with curiosity about the natural world; that they can ask questions, observe over time and hypothesize perform fair tests and gather evidence from these experiments, recording it in meaningful ways in order to share with an audience and for a purpose. As such, these skills are embedded throughout each year and built upon again and again in different scientific contexts. These skills will also form the basis of our Science Week which will be held in the spring term.

Thank you for your continued support— please do not hesitate to get in touch!

Ms Guggiari

Science leader

Science is a way of life. Science is a perspective. Science is the process that takes us from confusion to understanding in a manner that's precise, predictive and reliable - a transformation, for those lucky enough to experience it, that is empowering and emotional.

Brian Greene
